

# Activity: Bath Time for Bears

## Skill/Objective: Addition Facts to 7

### Directions:

1. Get a Bath Time for Bears paper and some counting bears.
2. You will also need crayons.
3. Use your counting bears to practice showing the addition fact at the bottom of the page. Say the math fact as you put the bears in the tub and add more bears as shown.
4. Say the math fact as a number sentence, like this: "There are 2 bears in the tub. 3 more bears get in. There are 5 bears in the tub altogether."
5. Write the "sum" or answer after the math fact on your paper.
6. Choose another math fact and continue putting bears in the tub as you practice adding. Write the "sum" or answer for each math fact.
7. Now choose one math fact at the bottom and circle it with a crayon. Use one color of crayon to draw bears to show how many were in the tub at first. Use a different color crayon to show how many more were added.
8. Check your picture and the math fact you circled to make sure they go together.

### MATERIALS-

- Plastic Counting bears (or copy and cut apart the paper counting bears)
- Bath Time for Bears** addition page
- Crayons

Name \_\_\_\_\_

# Bath Time for Bears

Use counting bears to practice the addition sentences below. Now circle one addition sentence and draw bears to show how many were in the tub at first. Then draw more bears to show how many were added.

$2 + 3 =$

$1 + 2 =$

$2 + 2 =$

$5 + 2 =$

$4 + 2 =$

$3 + 2 =$

$6 + 1 =$

$4 + 1 =$

$5 + 1 =$

If plastic bears are not available, copy these and cut apart for use with
