

CLOCK FRACTIONS

Name: _____

Date: _____

***DIRECTIONS:** For numbers 1–6, write the time as a fraction. If possible, express it in lowest terms. Then, convert the fraction into a percentage. (Example: 2:00 p.m. would be $2/12$. However, if you express $2/12$ in lowest terms, by dividing the numerator and the denominator by 2, your answer is $1/6$.) Try the challenge problems (#7 & #8) if you wish.*

#1.

Time: 2:00 p.m.

Fraction: $\frac{2}{12}$

Fraction in lowest terms: $\frac{1}{6}$

Percentage: 16.6%

#2.

Time: 3:00 p.m.

Fraction: _____

Fraction in lowest terms: _____

Percentage: _____%
