

Creating presentations with Photo Story 3 by Microsoft This program can be downloaded for free. Google Photo Story and click on the Microsoft link to download this application if necessary.

1. Before starting this project, you need to have your images prepared and saved in a folder. To maintain quality throughout your presentation, the images should be the same size. If resizing images isn't an option, make sure you get images that are roughly 640 X 480 pixels. If you use small images and stretch them, you will lose quality.
2. You should complete the **plan poem** document, which requires you to break down several parts of a poem and get images.
3. To open the program if it isn't on your desktop, choose **Start | All Programs | Photo Story 3**
4. When the following window pops up, select one of the following options and then click on the **Next button**.
5. In this case, **Begin a new story** was selected. If you had a project already created and it needed editing, you would choose **Edit a project**

- When the **Import and arrange your pictures** window pops up, click on the **Import Pictures** button.

- Navigate to the folder where you placed your images. Select all the images intended for this project. To select more than one image at a time, hold down the Ctrl key on your keyboard.
