## Instructions

- Input the title of your word search
- Select the size of word search you would like to create
- Input the answers to your word search by inputting one letter of a word in each cell.  
You must remain inside the established borders.

for example:

				s					
				p					
s	c	i	e	n	c	e			
			l				n		
			l					o	

- Write each answer word in the word list.  
There is a maximum number of words for each puzzle (limited by paper size and print parameters).

for example:

science  
spell  
one

- When all the answers are input and the word list is complete, click the print button.  
The remaining cells of the word search will automatically fill in with randomly generated letters.  
to make the random letters change, type the F9 (calculate) function key. The whole word search, except the answers, will change. (try it!)

for example:

q	k	x	s	o	o	c	m	q	
x	c	q	p	s	n	g	k	l	
s	c	i	e	n	c	e	t	s	
j	o	i	l	x	i	a	n	c	
x	h	v	l	q	g	j	c	o
